10 full modules — one of the most affordable PV programmes available

10 Expert Modules

PV · Drug Safety · Regulatory · Clinical Trials & more

CPD Certificate on Completion

Add a recognised CPD credential to your professional portfolio

COURSE OVERVIEW

Pharmacovigilance and drug safety are critical functions across the pharmaceutical, biotech and healthcare sectors. This CPD certificate gives you a rigorous grounding in the principles, regulations and practical skills that underpin drug safety work — from adverse event reporting and signal detection through to risk management, regulatory affairs and the toxicology and pharmacology knowledge that makes safety assessments credible. Suitable for professionals entering the field, those moving into a drug safety role from another discipline, and anyone who wants a structured, current update on regulatory practice.

COURSE MODULES

- 1 Pharmacovigilance
- 2 Drug Safety Management
- 3 Regulatory Affairs
- 4 Clinical Trials
- 5 Risk Management
- 6 Quality Assurance
- 7 Medical Writing
- 8 Data Analysis
- 9 Pharmacology
- 10 Toxicology

ENTRY REQUIREMENTS

- ✓ Open to all learners aged 18 and over
- ✓ No prior pharmacovigilance experience required
- ✓ A background in healthcare, science or a related discipline is beneficial
- ✓ A PC, Mac or tablet with a reliable internet connection

WHAT'S INCLUDED

- ✓ 10 expert-authored learning modules with full slide notes
- ✓ Practical case studies and worked examples throughout
- ✓ 10 module MCQ assessments (70% pass mark) via Moodle
- ✓ Reflective short-answer questions for deeper learning
- ✓ PDF CPD Certificate of Completion from UK Versity
